Data Scientist / Specializing in NLP & Tabular Data Analysis

Professional Summary

Informatics Engineering undergraduate at Universitas Dian Nuswantoro with a sharp focus on **Natural Language Processing (NLP)** and **Tabular Data Analysis**. Passionate about extracting value from both unstructured text and structured datasets through rigorous preprocessing, model fine-tuning, and deployment. Proven ability to build end-to-end solutions—from training predictive models (like Diabetes & Stunting prediction) to deploying them via APIs. Certified by Oracle and IBM (Coursera) in AI and Machine Learning foundations, seeking to leverage these skills in a professional Data Science role.

Education

- Aug 2023 – Present **Bachelor of Informatics Engineering**, *Universitas Dian Nuswantoro (UDINUS)*, Semarang
Focusing on Data Science, specifically NLP and Tabular Data processing.
- Jul 2020 – May 2023 **High School Diploma, Science**, *SMA Kristen YSKI*, Semarang

Technical Skills

- Data Science Focus **Natural Language Processing (NLP)**, **Tabular Data Analysis**, Text Mining, Sentiment Analysis
- Machine Learning Regression, Classification, Model Fine-tuning, Handling Class Imbalance
- Engineering API Development (Stuntify), MLOps basics, Model Deployment
- Tools & Cloud Python, SQL, Git/GitHub, Oracle Cloud Infrastructure (OCI)
- Soft Skills Analytical Thinking, Problem Solving, Technical Documentation

Key Projects

- 2025 **Stunting Prediction & Stuntify API**, *Personal Project*
- Developed a robust machine learning model using tabular data to predict stunting risks in children.
 - Engineered **"Stuntify"**, a deployable API wrapper for the model to enable real-time predictions and system integration.
 - Focused on optimizing recall and precision to handle critical health data effectively.

- 2025 **Diabetes Prediction (Fine-Tuned)**, *Personal Project*
- Built and fine-tuned classification models to predict diabetes onset based on diagnostic tabular metrics.
 - Applied advanced hyperparameter tuning techniques to significantly improve model accuracy and generalization compared to baseline models.
- 2025 **Conversational AI Companion**, *Personal Project*
- Designed a conversational agent leveraging NLP techniques to simulate human-like interaction and companionship.
 - Implemented text processing pipelines to handle user inputs and generate context-aware responses.
- 2025 **Sentiment Analysis Project**, *Personal Project*
- Analyzed unstructured textual data to classify public sentiment (positive, negative, neutral).
 - Utilized NLP libraries for text preprocessing (tokenization, lemmatization) and feature extraction.

Certifications

- 2025 **Oracle Cloud Infrastructure 2025 Certified AI Foundations Associate**, *Oracle*
Validated fundamental understanding of AI workloads on cloud infrastructure.
- 2025 **Oracle AI Vector Search Certified Professional**, *Oracle*
Demonstrated proficiency in modern vector search technologies for AI applications.
- 2025 **Supervised Machine Learning: Regression**, *Coursera (IBM)*
Mastered techniques for predictive modeling and continuous variable analysis.
- 2025 **Supervised Machine Learning: Classification**, *Coursera (IBM)*
Specialized in categorical data prediction and handling class imbalances.
- 2025 **Artificial Intelligence Essentials V2**, *Credential*

Languages

- Indonesian Native Speaker
- English Professional Working Proficiency *Capable of professional communication and technical documentation.*
